

## Environment Policy

Barben Industries recognizes the importance of the environment and we are constantly improving our standards to minimize the environmental impact on our operations. At Barben Industries the health of our employees and visitors is very important to us which is why as a company we have taken on the challenge of being a green and seeing green.

The Barben Management team is committed to continual improvement in our operations, including manufacturing, administration, service and products.

To achieve our goal Barben will:

- Minimise risk from all environmental aspects and potential of adverse environmental events
- Continue to manufacture using recycled stainless steel when possible
- Implement innovative product design to reduce environmental impact when manufacturing
- Conserve energy and natural resources
- Reduce emissions & waste
- Ensure our customers are informed of Barben's environmental policy
- Encourage our employees to contribute to improving the environment at work and outside the workplace
- When training new staff, make them aware of our company procedures regarding the disposal of waste
- Continue to provide training for all employees
- Encourage recycling
- Minimise the use of chemicals
- Comply with relevant environmental legislation, codes of practice standards
