Hardware **BIEN**

Barben Architectural Hardware is a leading designer and manufacturer of a comprehensive range of stainless steel cabinet handles, lip pulls, recessed pulls and knobs. Regardless of the application you can be assured that Barben will have a handle to suit your every application.

In keeping with modern design trends the complete collection of Barben cabinet handles are minimalist in design and compliment our entry door handle range to allow harmony and flow throughout your project space.

The cabinet handles are manufactured using only the highest grade solid stainless steel raw material to provide an unsurpassed surface finish. Available in both round and square line designs, the handles are minimalist in design to provide timeless aesthetic appeal.

Barben cabinet lip pulls are available in various designs and mounting applications and as with all of the Barben handles custom manufacture sizes can be produced upon request.

Our recessed pulls are adhesive fix so there are no visible screw fixings and provide a substantial finger grip for ease of use. The recessed pulls are suitable for sliding doors, cupboard doors and cabinetry.

For a less is more design approach Barben also offer a range of stainless steel cabinet knobs.

All of the Barben handles are available in a wide variety of finishes including satin stainless steel, polished stainless steel, powder coat and electroplate to compliment your project.

For further information and technical information please refer to the Barben Architectural Hardware web site at www.barben.com.au
